

3D Printing and Design
For Students in Grades 3-5
At the Ashland Innovation Center at AHS
Offered by Ashland Community Education

Session 2

3D Printing and Design

Are you a creative mind who wants to see your thoughts printed into reality? Are you thinking that making gifts for holidays and birthdays could bring lots of fun and joy? Then this session at the AIC may be just what you are looking for! There are few more exciting and accessible fields today than 3D printing. Over the course of this five week session, participants from the Mindess School will learn how to design their own creations. Students will learn to work with introductory CAD software to create their 3D designs. Registration for this session will be \$50, and every participant can expect to come home with multiple, self-designed 3D prints. Have you done a 3D printing session at the AIC before? If seats are available, we encourage you to join us again and continue to build your skills!

5 weeks, Tuesdays, November 20, 27, December 4, 11, 18

Time: 2:50-3:50 pm

Seats: 20 (if necessary, a lottery will be held for all registrations received by **November 11th**)

Participants will be bussed from Mindess to AHS

Participants must be picked up at 3:50 at AHS (no late bus is available)

\$50 fee (needs based scholarship available upon request)

Registration: bit.ly/MindessAtAIC
