

## **3D Design & Modeling**

For Mindess Students

At the Ashland Innovation Center at AHS  
Offered by Ashland Community Education

The Ashland Innovation Center proudly announces it's first after school program for Mindess students - 3D Design and Modeling!! This is the first of five workshops we will be running throughout the entire school year. In this workshop, students will be provided with all of the materials needed to design models of real life objects, and objects of their imaginations. It is important to help students grow a sense of how 3D objects are built and can be manipulated. This workshop will help students better understand concepts needed for when they want to design and build more sophisticated projects in our makerspace. Students will get a chance to work with multiple materials including foam, plastic, pvc, cardboard, wood, and more.

3D Design & Modeling is for Mindess age students (grades 3-5), it will be held at the Ashland Innovation Center, located at Ashland High School Room A150

Tuesdays starting Sept 19, for five weeks, (9-19 – 10/17) 2:50-3:50pm

Transportation: Students will be bused from Mindess to AHS;

Guardians are responsible for pickup at 3:50

Max Capacity: 20 participants (lottery will be held if more than 20 registrations received)

Deadline to Register: Sept 11, 2017 Fee: \$50

Please do not allow personal finances to prevent students from registering. Need based scholarship available.
